

20th European Congress of Obstetrics and Gynaecology

WELCOME LETTER

The Congress will bring you up to date information about all aspects of Obstetrics and Gynaecology. All of the major European specialist societies will contribute to the programme. There will be lectures from some of Europe's foremost experts. There will be hands-on sessions where you can learn new techniques. There will be scientific sessions to keep you up to date with the latest advances. Best of all, there will be hundreds of your colleagues from all over Europe so that you can exchange ideas and compare experiences.

This will be a wonderful opportunity to be in touch with developments in the specialty while enjoying the beautiful city of Lisboa. The science, the entertainment and the company will be first rate. Don't miss it!

18th Portuguese Congress of Obstetrics and Gynaecology

WELCOME LETTER

Fellow Colleagues,

The Federation of the Portuguese Societies of Obstetrics and Gynaecology (FSPOG) was established in 2005, thanks to the joint efforts of the Society of Obstetrics and Gynaecology, of the Society of Gynaecology, of the Society of Reproductive Medicine and the Menopause Society.

As President of this Federation I am very pleased, in my own name and on behalf of all the members of the federated societies, to welcome you to the 18th Portuguese Conference of Obstetrics and Gynaecology and to the 20th Conference of the European Board and College of Obstetrics and Gynaecology (EBCOG).

The two conferences will run sequentially from 4 to 8 March, 2008, in Lisbon, with one only registration and the Portuguese Congress will be held in both Portuguese and English.

We have exerted our best efforts to provide guests and delegates with an excellent scientific programme, covering the most significant areas of the specialities, as well as an enjoyable social programme in the beautiful, welcoming and cosmopolitan city of Lisbon.

EUROPEAN BOARD AND COLLEGE OF OBSTETRICS AND GYNAECOLOGY (EBCOG)

EBCOG is the Board of the Section of Obstetrics and Gynaecology of the Union Européenne des Médecins Spécialistes (UEMS). The purpose of UEMS is to harmonize and improve the quality of medical specialist practice in the EU. Based in Brussels, EBCOG was set up in 1996 and currently has 33 member countries.

EBCOG's aim is to improve the health of women and unborn and newborn babies by promoting the highest possible standards of care. To do this EBCOG brings together eminent professionals from all its member countries and also works closely with the four subspecialist pillars of Materno-Fetal Medicine (the European Association of Perinatal Medicine), Gynaecological Oncology (the European Society of Gynaecological Oncology), Reproductive Medicine (the European Society of Human Reproduction and Embryology) and Urogynaecology (the European Urogynaecology Association). Significantly, EBCOG has been formally recognized by the International Federation of Gynaecology and Obstetrics (FIGO) as the organization which officially represents European Gynaecologists within FIGO.

EBCOG's core activities are education and training and EBCOG has produced a specialist training program and log book and, together with the sub specialist societies, has developed training programs and log books for each of the subspecialties. A program for 'Training the Trainers' is currently being developed.

In addition EBCOG has a hospital visiting and accreditation system, via which hospitals can request a visit from EBCOG and, subject to the outcome of the visit, can be accredited for a five year period as an EBCOG-recognized training centre. A sub specialist visiting program began recently and sub specialist training centers can now receive joint recognition by EBCOG and the relevant sub specialist society.

EBCOG works closely with and very much supports ENTOG, the European Network of Trainees in O & G and, in conjunction with ENTOG, runs hands-on training courses immediately prior to each European Congress of O & G. These Congresses take place every two years and the 20th European Congress is due to take place in Lisboa on 4 - 8 March 2008. The 21st European Congress will be held in Antwerp in 2010. Information on the Lisboa Congress is now available on EBCOG's updated website: www.ebcog.org

EBCOG is very keen to ensure that it represents Obstetricians and Gynaecologists from Europe as a whole, and one of its successful strategic priorities has been to increase membership from central and eastern European countries.

CME CREDITS (EUROPE)

The 20th European Congress of Obstetrics and Gynaecology is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists.

The EACCME is an institution of the European Union of Medical Specialists (UEMS).

The European Congress of Obstetrics and Gynaecology is designated for a maximum of 6 European CME Credits (ECMEC) for a full day attendance and 3 for half day.

Each medical specialist should claim only those hours of credit that he/she have actually spent in educational activity.

EACCME credits are recognized by the American Medical Association for the Physician's Recognition Award (PRA). To convert EACMME credit to AMAPRA 1 credit, contact the AMA.

The attendance certificate is available at the CME desk, upon return of the CME evaluation form.

Coordinators: A. Fradique (PT), K. König (DE)

Instructors: M. Farugia (UK), Y. Van Belle (BE), R. Molinas (PT), V. Kopitovitch (S), R. Socolov (R), B. Zeruga (SI), J.L. Silva Carvalho (PT), A.L. Ribeirinho (PT), C. Barros (PT), C. Silva (PT), C. Leitão (PT), F. Faustino (PT), F. Nogueira Martins (PT), M. Martinho (PT)

The workshop intends to provide awareness of and instrument familiarity with modern bipolar instrumentation of Karl Storz GmbH and Ethicon Women's Health & Urology-Gynaecare.
These sessions are open to all levels of experience.

In cooperation with the European Society of Gynaecologic Endoscopy (ESGE)

HOT-11 / 11A 10.30 – 12.30 (12 PARTICIPANTS)	EPIDEMIOLOGY IN PRACTICE <i>Coordinator: E.. Sommer (UK)</i>	ROOM 1.07
--	--	------------------

Speakers: **B. Liu (UK) , P. Doyle (UK)**
1 – Introduction **P. Doyle (UK)**
2 – Work in Groups **Tutors: P. Doyle (UK) and B. Liu (UK)**

Learning objectives: this seminar will give an introduction to the main epidemiological principles and study designs. Formal training in this area is usually not part of the medical curriculum, although having the tools of epidemiology and statistics is an asset for clinical practice. In a workshop format, participants will learn to apply some key concepts while appraising a scientific paper. No prior knowledge of epidemiology/statistics is required. All concepts introduced will be explained in the course.

Short Company Descriptions

Bayer HealthCare

Bayer HealthCare, a subsidiary of Bayer AG, is one of the world's leading, innovative companies in the healthcare and medical products industry and is based in Leverkusen, Germany.

The company combines the global activities of the Animal Health, Consumer Care, Diabetes Care and Pharmaceuticals divisions. The pharmaceuticals business operates under the name Bayer Schering Pharma AG.

Bayer HealthCare's aim is to discover and manufacture products that will improve human and animal health worldwide.

Bayer Schering Pharma

Bayer Schering Pharma is a worldwide leading specialty pharmaceutical company. Its research and business activities are focused on the following areas: Diagnostic Imaging, Hematology/Cardiology, Oncology, Primary Care, Specialized Therapeutics and Women's Healthcare. With innovative products, Bayer Schering Pharma aims for leading positions in specialized markets worldwide. Using new ideas, Bayer Schering Pharma aims to make a contribution to medical progress and strives to improve the quality of life.

Clinical Innovations (Europe) is firmly focused in providing innovative, beneficial products in the Obstetric and Gynecology field. Although a young company (seven years old) CIE has grown from strength to strength from solely distributing the Kiwi Vacum delivery system to a range of our own products. CIE now has a range of distributions throughout Europe and now looking worldwide.

Crioestaminal :Cryopreservation of stem cells from umbilical cord blood, **a tissue which was previously discarded**, appears **nowadays** as a “biological insurance”. The **main aim consists** at their potential future use in the treatment of **several blood** diseases during the lifetime of both the newborn itself and of its relatives. Crioestaminal is developing research projects in order to enlarge the field of therapeutic applications for stem cells from umbilical cord blood into **non hematopoietic fields**.

“**Grupo Decomed**”, a Portuguese company created in 1997, has 3 Business Units:

Pharmaceutical brand products: Decomed Farmacêutica;

OTC products: Zeler and Generic products: Genedec.

From all those drugs, we enhance Venex® Forte.

Venex® Forte is “anatomical therapeutical chemical (ATC)” classified as C05CAO3.

His active compound is micronized purified diosmin and his therapeutical indications are Chronic Venous Insufficiency and Haemorrhoidal Disease.

Dermoteca is a Portuguese company created in 1994, with the goal to launch products in the Cosmetic Dermatological field. Over the years, Dermoteca has expanded to other medical areas, such as gynaecology. In the year 2000, Dermoteca has launched it's own trademark, D'AVEIA, which has been rapidly recognised and prescribed by the specialists in different medical areas.

EFFIK

“Founded in 1992, EFFIK is a pharmaceutical company developing innovative products in Gynaecology, namely contraception, vitamins and minerals for pregnancy, HRT, gynaecological mycosis, acne. Our main objective is to be a Gynaecology reference group

in Europe."

LISBON - PORTUGAL

Portugal is situated in the most western part of Europe. It covers an area of 92,000 square kilometres and has a population of 10 million people. It was founded as an independent kingdom in the Iberian Peninsula more than eight centuries ago. Lisbon is the capital of the country. The history of the city goes back to the time of the Phoenicians, then the Greeks and after them the Romans. After the fall of the Roman Empire came the Barbarian invasions and in the eighth century, the Arabs started to invade the country. In 1147 the first king of Portugal won the city from the Moors with the help of the Crusaders, after a four-month siege. Since then, Lisbon has continued to grow and develop, all the time celebrating its rich cultural diversity. Nowadays it is a modern city with a wealth of historic monuments and museums, a warm and friendly atmosphere, moderate climate and full of hospitality. It is well worth a visit.

Climate

Lisbon falls within both Atlantic and Mediterranean climatic zones. Due to these characteristics, there is little variation in temperature, with lots of sunny days even during winter. In March you can count on some showers and mild temperature (around 16°C).

What to see

Lisbon offers its visitors an endless selection of things to see and do. Both the lovers of daytime outings and those who prefer nightlife will be spoilt for choice.

Within a wide choice of places that visitor cannot fail to visit, we suggest:

- The historical quarters Alfama, Castelo, Mouraria, Bairro Alto, Chiado, Bica, Baixa, Rua Augusta
- The Belém Tower
- The Jerónimos Monastery
- The Discoveries Monument
- The São Jorge Castle
- The Lisbon Cathedral
- The ruins of Carmo Convent
- The Santa Justa Elevator

Amongst the Museums

- The National Ancient Art Museum
- The Modern Art Centre Museum
- The Chiado Museum
- The Water Museum
- The Electricity Museum
- The Gulbenkian Museum
- The National Tile Museum
- The House - Museum of the “Medeiros e Almeida”
- St. Anthony Museum
- The Folk Art Museum
- The Maritime Museum
- The National Coach Museum
- The Music Museum

Around Lisbon

- Estoril and Cascais (famous beach resorts)
- Sintra (World Heritage site)
- Arrabida, Setúbal and Sesimbra (across the bridge)
- Obidos, Alcobaça and Batalha (north)

Where and what to eat

Lisboa is the ideal destination for good food lovers. Visitors will find restaurants with typical food and excellent service, where prices may vary between €25,00 and €35,00.

Because of its location by the sea, Lisboa and its surroundings are ideal to try delicious fish dishes. “Bacalhau” (dried, salted cod) is a famous Portuguese dish.

Cakes and deserts are also very good. The “Pasteis de Belém” in particular are a must. Made from a special recipe that belonged to a friar from the “Mosteiro dos Jerónimos”, they have been a delight to Portuguese taste buds for over 160 years.
